

KVARNER - CROATIA

Please all your senses!

LOŠINJ...

YOUR ISLAND OASIS

Where the stars look beautiful like nowhere else, where you breathe with your full lungs, where waves of Istria, Kvarner and Dalmatia intertwine, and where the last North Adriatic school of dolphins swim happily – that's where the Lošinj Archipelago is located.

It comprises the large and woody Lošinj, fertile Unije, flowery Ilovik, sandy Susak, and a number of attractive smaller islands, rocks and reefs. Popular locations include Punta Križa with its rich biodiversity, Ustrine with its magnificent view, and the ancient Osor. Our Belej, Sveti Jakov, Nerezine, Čunski, Artatore and Veli Lošinj are pearls of the Lošinj Archipelago. Each one of them hides traces of past times and our people carefully cultivate the cultural heritage entrusted to them – distinctive speech, folk costumes and customs, adapted to a modern guest. This is a magical place that will seduce you with all its attributes – scents, tastes, sounds and preserved natural beauties. If you are revisiting this island, you will want stay, and if you are coming for the first time, you will want to come back as soon as possible!

FEEL IT...

THE ISLAND OF VITALITY

Lošinj has a health tourism tradition of over 125 years. Thanks to its mild Mediterranean climate, pinewoods and air, this is an ideal place to recreate your body and spirit. Learn to live with us, in harmony with nature!

The pleasant climate with over 2600 sunny hours a year, an air full of aerosols and Professor Ambroz Haračić are the reasons why Lošinj was proclaimed a health resort way back in 1892. Even back then it became a favorite holiday spot for the Austro-Hungarian aristocracy, whose villas and summer residences still enrich the cultural and tourist heritage of the island. This is why we invite you to an aroma quiz, natural herb tasting and an exhibition of our flora during the Ambroz Haračić Days in May. Numerous animal and plant species have found their home on Lošinj. This is an island where everything smells like rosemary, lemons and oranges, lavender and myrtle, immortelle and sage, thyme and pines, cyclamen, crocus and lilacs... This is an island attracting with its aromas from afar and luring its guests to surrender to all senses – a unique aromatic oasis.

BREATHE IN...

Let yourself go! See what it's like to be pampered by nature that has given Lošinj 1018 plant species – 939 are autochthonous and 230 are herbs...

WHEN NATURE HEALS...

Regarding tourism, Lošinj was first mentioned in 1885 when the first tourists on the island were formally registered. They were Dr. Conrad Clar, a renowned Austrian physician, and his son who had incurred a severe respiratory disease not long before they arrived. The child recovered and Lošinj's reputation as a climate resort soon and suddenly blossomed.

That is how the story of health tourism started on this island that still has top-quality air. However, if you think everything else is history – you are wrong. This is exactly why we provide an unforgettable year-round experience on our archipelago.

THE ARCHIPELAGO WITH THE STARRIEST SKY

Thanks to its special position in the sea, Lošinj offers what others cannot when the Adriatic winds bora and jugo blow. When the sea begins to foam on one side of the island, we feel our yachters' adrenaline and divers set off to explore the underwater world and its wealth. This advantage of our island has been recognized by navigators who like to find a quiet harbor in one of our five marinas year after year.

The diversity, distinctiveness and littoral charm of the islands of Unije, Ilovik and Susak are also a magnet for an increasing number of tourists. On sandy Susak, you can still hear their traditional speech and see their unique folk costumes. On Unije, you can see the olive groves or go fishing. APOXIOMEN – A CULTURAL PEARL

In addition to the tourist map of the world, Lošinj is included in the archeological map of the world because a unique ancient bronze statue dating back to the 2nd or 1st century B.C. has been found in the blue underwater world surrounding Lošinj, between the island of Vela Orjula and Lošinj.

The Croatian Apoxiomen, as the only large bronze statue found on the east coast of the Adriatic is referred to, is the most integral and best preserved one ever found in the entire world. It was found in 1996 by a Belgian tourist. It was made by an unknown author and its home is exactly where it was found – in the Kvarner Palace on Lošinj.

However, Lošinj has plenty of other cultural heritage, including Austro-Hungarian villas and captains' houses, monasteries, a fort, a basilica, ancient remains, museums, churches and chapels containing true little art fortunes. Visit the Town Museum in Mali Lošinj located in the Fritzzy Palace dating back to the 15th century, the Kula Museum & Gallery in Veli Lošinj, and Osor, a museum town. There you will discover traces of ancient villas, renaissance portals and monasteries, and some Patrician crests on fronts of stone houses accurately presenting what this 4000-years-old town looked like in the past.

Don't miss the votive chapel Annunziata in Čikat Bay, telling a story of this island's rich maritime history, its glorious captains and their fleets. Learn about the lives of our famous seamen through our topic "Around the World with Lošinj Sails" and the story about the waiting, fears, love and hopes.

You probably did not know that there were six shipyards right here in the 19th century and that Mali Lošinj was the second most important port in the Adriatic at the time. Lošinj's shipbuilding industry had already produced almost 150 sailing ships.

TASTE IT...
